## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of group I in the reply filed on 5/24/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application is in condition for allowance except for the presence of claims 22-35 to group II non-elected without traverse. Accordingly, claims 22-35 have been cancelled.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: the prior arts fail to show an aircraft having a rigid suspension structure being connected to the lift unit (having a nacelle and a tailboom pivotally coupled to the nacelle, and a payload unit being connected to the second end of the suspension structure. The prior arts also fail to disclose a payload unit pivotally coupled to the lift unit such that the tailboom and payload unit are free to independently pivot with respect to each other about a first axis and means to latch the tailboom to the payload unit in a vertical orientation and releasing the tailboom from the payload unit to allow it to pivot independently of the payload unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
